Precision Farming Set-Up and Support

Service	Price
To give advice and training in the use of the GateKeeper software and it's integration with machinery, soil testing and yield data to produce accurate and useful reports and field records. (Onsite at customer premises).	£50.00 /hr
Update software on a receiver and display.	£50.00
Supply a new high quality compact flash card and copy data from an older card.	£49.99
Data conversion between old and new displays or CommandCenter.	£75.00
Yield mapping and interpretation. (We can take data from all makes of Combine, not just John Deere).	£0.50 /acre (based on 700 acres) discounts over 1000 acres.
In field AutoTrac setup on a Seed Drill that is calibrated and ready to go drilling.	£100.00
On farm setup of Seed Drill or Fertilizer Spreader ready to carry out variable rate tasks. (This will include operator training, but not any extra wiring harnesses that may be required).	£75.00
Data card setup for Combines, Forage Harvesters, Sprayers and Spreader. (This allows straightforward, accurate data collection by pre-populating screens with your field names, crops and varieties).	£100.00 for the first year. £50.00 for subsequent year.
